

Health and Safety

Health and Safety Guidance

Health and safety has become a very big part of our society and is indeed a very big part of our business. However, there are a few ways in which you the client can assist us in maintaining a safe working environment for you and your guests as well as our staff.

Children and Pets

As you can imagine the area in which we work at your venue can be dangerous as we are continually using; sharp knives and carrying/using hot equipment. So we make every effort to make our area as safe as possible and politely request that children and pets are under adult supervision.

Electricity

At most venues we will normally require electricity to run the motor on our machine. We also sometimes need to use lighting equipment in outdoor venues. We will require a 13 amp socket which we will perform a visual safety check on before use. We also do everything we can to prevent trip hazards of any trailing cables.

On behalf of **Go the Whole Hog of Botley** Thank you!
